Superior Genetics. Better Service. Lower Prices.

Taylor Nursery is proud to introduce two premium loblolly blends this year – **ELITE** and **SUPERIOR** – both offering exceptional volume gain, fusiform rust resistance and form improvement.

Composed of the very best selections from our third-cycle loblolly seed orchards, these blends represent the latest in genetic improvement from 60 years of our tree-breeding efforts. The Elite blend offers 8 percent additional volume growth to the already outstanding Superior blend.

What does PRS mean?

- * PRS = Performance Rating System
- P = Productivity Rating
- R = Rust Resistance
- S = Straightness

Because of the high level of genetic variation in loblolly pine, the NCSU Cooperative Tree Improvement Program, of which the South Carolina Forestry Commission is a member, developed the Loblolly Pine Performance Rating System (PRS™) as a service to landowners, nursery managers, the tree improvement community and loblolly pine breeders. PRS™ also stands for Productivity, Rust, and Straightness, the three traits evaluated in all genetics trials. The PRS™ expresses the genetic potential of a family for stem volume production, resistance to fusiform rust disease, stem straightness. For more information, visit www.treeimprovement.org/prs. PRS sheets can be downloaded at www.trees.sc.gov/nur.htm
